(ii) 10% power is allocated to the State in which the power station is located; and

(iii) the remaining 75% power is allocated amongst the States of the region (including the 'Home State') in accordance with the energy consumed by, and the Central Plan assistance to the States during the last five years. The needs of the Union Territories are also met through appropriate allocations.

B. *Present Criteria for Allocation of Power to the States from Central Sector Hydel Stations:*

(i) 15% of the generation capacity will be kept as 'Unallocated' at the disposal of the Central Government to the distributed within the Region or outside depending upon overall requirements;

(ii) 12% of power from energy generated by the power station would be supplied free of cost to those states of the region (including the State where the hydro-electric project is located) where distress is caused by setting up the project at the specific site, like submergence, dislocation of population; the allocation being made in proportion to the extent of such distress. The energy generated figures for the purpose would be calculated at the bus bar level, i.e. after discounting auxiliary consumption but without taking into account the transmission line losses. The extent of distress caused would be assessed for the purposes of allocation of 12% free power by the Central Electricity Authority in consultation with the concerned States; and

(iii) The remaining power (73%) would be distributed between the States of the Region on the basis of the energy consumed by, and the Central Plan Assistance given to various States in the Region during the last five years, the two factors being given equal weightage.
